

ACTIVE & VIBRANT LEADERSHIP IS THE KEY TO SUCCESS

Is your organizations leadership lacking?
Is it time to assess where your leadership stands?

Our company provides Leadership and Planning workshops. We've done this for many years, and have assisted small companies, non-profit organizations, and rural communities across the nation. This year, we'll be working with organizations in Montana, Louisiana, and of course, Kansas.

The one constant that we've found, is that regardless of the location, or the type of organization we're dealing with, leadership is the key component to success. If leadership is lacking, organizations often fail. Whether it's a small community, a business, or some other type of organization, active and vibrant leadership is essential for success.

Our workshops often start with an assessment of those present. Why are you here? What is your role? What is the current status of this organization, thriving, struggling, or neither? Where do you see this organization in five years?

ARPI provides business and community coaching throughout the United States. If you have a business question for Jack, email him at jack.newcomb@totalcsi.com. You can also visit the ARPI website, www.advancingruralprosperity.com.

Does the organization have a vision and/or a plan? Using the feedback we receive, the Board/Leadership Excellence workshop is structured to address the needs of that particular organization. A lot of the Boards we work with meet consistently, but have become frustrated with the lack of progress. Of course, it's very difficult to make progress if you don't know the destination, thus the importance of a plan.

A dynamic strategic plan can only be developed once the leadership team understands its role, and has effective leadership in place to manage the process. It's been our experience that any plan is only as good as the leadership of the organization. The best plan in the world will fail if the leadership is lacking.
